WHEN “GOOD ENOUGH” ISN’T GOOD ENOUGH

Microfilm digitization has often been treated as a task to complete—but today, it’s about so much more than just scanning and storing files.

As organizations rely more on digital access, issues like inconsistent image quality, readability, and rework are becoming harder to ignore.

In this month’s From Film to Future blog, we explore why “good enough” digitization is falling short—and what it means for the future of your workflow.

TRADESHOW | HAPPENING NOW

We're at **PLA 2026!** Are you?

Join us in Minneapolis, April 1-3, and visit **Booth 1923** to see ScanPro Smart Scanning™ in action and explore in-house microfilm digitization for public libraries.

Stop by and enter to win a portable power bank.

If you're there, we look forward to seeing you!

ScanPro Tip

Improve Your Digitization Results

Small adjustments can make a big difference.

Focus on consistency at capture. Ensure images are aligned, evenly exposed, and easy to read from the start. This helps reduce rework and ensures your files are ready to use right away.

SHARE THE SCANPRO LOVE

We love hearing from you!

Have a ScanPro® that's making your work easier, your scans sharper, or your archive more accessible? **Tell us what you love about it** (and even send a photo!) and we'll send you a free microfiber dust cover to help protect your scanner. It's a fun way to celebrate the real stories and feedback from ScanPro users like you — and see what others appreciate about their ScanPro too. Learn more and share your experience [here!](#)

"We love our ScanPro 3000. It's a powerful yet compact, user-friendly solution we rely on daily for patron research. Its ability to handle all microformats has even allowed us to support other institutions when their equipment failed. A truly reliable and versatile tool."

-Woburn Public Library, Glennon Archives, MA
